Continuing Dental Education Units:
You will earn a total of 7.5 CEUs for attending this program. IUSD is an ADA CERP and an AGD Accepted Fellowship/Mastership National Sponsor. Contact IUSD CE at dsce@iupui.edu or 317-278-902 for questions.

Disclosure Statement
In accordance with the ADA CERP Standards for Commercial or Promotional Conflict of Interest, educational programs sponsored by Indiana University School of Dentistry must demonstrate balance, independence, objectivity, and scientific rigor. Speakers are required to disclose any relevant financial interest or other relationship with the manufacturers of any commercial product(s) and/or provider(s) of commercial services that are discussed in an educational activity. Sponsorship of a continuing education program by Indiana University School of Dentistry does not necessarily imply endorsement of a particular philosophy, procedure, or product by this institution. Note: While it offers CE credits, this activity is not intended to provide extensive training or certification in the field.

Cosponsored by The Indiana Section of the American College of Dentists and the IUSD Laskin Lecture Series. Indiana University COVID-19 policies will be followed for this event.

Please register by April 18, 2022. No refunds will be issued after April 2022.

A Narrative Ethics Approach: Equity, Inclusion and Wellbeing for Individual, Interpersonal and Institutional Professional Practice

Presented by Carlos S. Smith, DDS, MDiv, FADC

Society has afforded the dental profession the privilege and obligation of self-government, in large part due to our dedication to the highest of ethical standards. Empathy, while widely understood as necessary for patient care, is also an appropriate ethical lens for how we engage with peers, colleagues and our profession as a whole. The unrelenting effects of the COVID-19 global pandemic have peeled away what was already a thinly veiled veneer of combating health inequities locally and abroad. Provider wellbeing is front and center, as healthcare providers must balance altruistic practice and their own self-care. Participants will apply the principles of ethics to analyze ethical decisions using a narrative ethics model. Ethical topics explored will include diversity, equity, inclusion, wellbeing, burnout and resilience.

Objectives:
- Define and explain how narrative ethics techniques build empathy
- Define the concepts of diversity, equity, inclusion and wellbeing as they relate to ethical professional practice
- Discuss and explain the individual, interpersonal and institutional roles of mitigating ethical issues of equity, inclusion and wellbeing
- Analyze ethical scenarios with an equity, inclusion and wellbeing focus using narrative ethics techniques

Dr. Smith is the inaugural Director of Diversity, Equity, and Inclusion and the Director of Ethics Curriculum and Associate Professor in the Department of Dental Public Health and Policy at Virginia Commonwealth University School of Dentistry. Dr. Smith is an appointee to the American Dental Education Association (ADEA) Collaborative on Dental Education Climate Assessment and is also a member of the Editorial Board of the Journal of the American College of Dentists.

A Jurisprudence Update from the Indiana State Board of Dentistry

Presented by Ted Reese, DDS

Following Dr. Smith’s presentation, Dr. Reese, president of the Indiana State Board of Dentistry, will provide an update on Dental Law in Indiana.

IN-ACD MAYNARD K. HINE SCHOLARSHIP LECTURE

Emerging Trends in the Diagnosis and Management of Chronic Orofacial Pain

Presented by Theresa S. Gonzales, DMD, MS, MSS

Chronic orofacial pain (COFP) is relatively common with approximately 7% of the general population reporting such symptoms which concomitantly occur with other somatic symptoms that cannot be adequately explained by known organic pathology. While the etiology of COFP is far from certain, there is compatible evidence of central nervous system sensitization and neural reorganization in the brain, brainstem and spinal cord. The trigeminal brainstem sensory nuclear complex is an important site for craniofacial nociceptive transmission and may be a key region of neuroplasticity and central sensitization. There is a growing body of literature that identifies morphological abnormalities in the brains of individuals with chronic pain conditions such chronic oro-facial pain, migraine, chronic back pain, chronic tension type headache and irritable bowel syndrome. This course is designed to update the clinician with deployable contemporary diagnostic and treatment algorithms in our ongoing efforts to responsibly manage orofacial pain.

Objectives:
- Explain the complex, multidimensional, and individual nature of pain.
- Describe the current theories and the science regarding pain and pain management.
- Recognize and use validated and reliable tools for the measurement of pain and associated symptoms.
- Describe factors than can interfere with or facilitate effective pain management strategies.
- Given appropriate information, develop and strategically describe the implementation of an evidence based pain management strategy.

Dr. Gonzales serves as the Executive Director of the American College of Dentists. In 2013, she retired from the United States Army Dental Corps after a long and distinguished career in active federal service to this nation. Dr. Gonzales has authored over seventy scientific publications in peer-reviewed journals and was the recipient of the International College of Dentists Award for Excellence in Research. She has received the Order of Military Medical Merit and the Surgeon General’s A designator for clinical excellence. Dr. Gonzales is also a Professor of Oral and Maxillofacial Pathology at the Medical University of South Carolina- James B. Edwards College of Dental Medicine.

REMEMBERING DR. DANIEL LASKIN

Dr. Daniel Laskin (DDS’47), a legend in oral and maxillofacial surgery, died on Dec 8, 2021.

Dr. Daniel M. Laskin received his DDS degree from Indiana University School of Dentistry and his MS degree in oral surgery from the University of Illinois. He also holds an Honorary Doctor of Science degree from Indiana University. In 2007, a large gift from Dr. Laskin established the annual Dr. Daniel Laskin Professional Ethics Lectureship at IUSD, which provides continuing education by highly regarded speakers on the ethical practice of dentistry.

While Dr. Laskin made many important contributions to the field of dentistry in his multifaceted career, he said he especially enjoyed his role as teacher. “If you leave a mark in the field, it’s in the people you teach,” he said. “They remember you and pass on the torch.”

TUITION

Laskin and Hine lectures: $200 ACD Fellows | $225 Non-Fellow Dentists | $125 staff accompanied by the dentist. Includes lunch and study materials.

TO REGISTER

To register, complete the registration form and send with your check. Check payments must be made out to IN American College of Dentists. Send to:
